CURVED GLASS KITCHEN SPLASHBACK - BY GLASSHAPE

SplashShield®

CURVED GLASS KITCHEN SPLASHBACK - BY GLASSHAPE

closeup of SplashShield

easy installation

- 1 Simply attach the three chrome feet onto the glass, one at the centre and the others 2-3cm from the edge of the glass.
- 2 Place on your bench and find the best position.
- 3 Mark the bench with removable pencil where the center of each foot needs to be.
- 4 If screwing the feet on, remove again from the glass and pre-drill the bench at the marked locations. Screw through the feet and re-attach the glass again.
- 5 If glueing on, simply apply a small blob of silicone waterproof glue on top of the marked positions and return the SplashShield to its final position. Allow glue to set before cleaning.
- 6 Clean glass with any residential glass cleaner or soapy water.
